

Margin Requirements

Clients must consistently maintain the Minimum Margin Requirement for all active positions to avoid automatic liquidation.

FinexGrow.com retains the authority to close any or all active positions if the Minimum Margin Requirement is not upheld.

Please note that margin requirements may be adjusted at any time. To help prevent misunderstandings, **FinexGrow.com** will make reasonable efforts to notify clients of any upcoming changes to margin requirements via email and through messages on the trading platform at least seven days in advance of implementation.

MARGIN REQUIREMENT CALCULATION

Margin requirements are determined by dividing the total dollar value of a position by the maximum allowable leverage for that trading instrument.

Example A:

Position: 35,000 EUR/USD at 1.4000

Calculation: $35,000 \times 1.4000 \div 200$ (leverage) = \$245

Example B:

Position: 1,400,000 USD/JPY

Leverage: 200:1 (0.5% margin requirement)

Calculation: 0.5% of 1,400,000 = \$7,000

MARGIN CALL PROCEDURE

If you are using the Web or Mobile trading platform provided by **FinexGrow.com**, and your position value falls below 100% of the initial margin requirement, you may receive an alert via email or other forms of notification.

However, please be aware that no alerts are guaranteed at exactly the 100% margin level. Therefore, it is strongly recommended that clients regularly log into the platform to check and monitor their margin levels.

These alerts are provided as a courtesy and do not place any obligation on **FinexGrow.com** to manage your account performance or notify you of margin levels or actions you may consider. Continuous monitoring of your account is your responsibility. If your account reaches the Margin Call level, and later the margin rises above 100%, the Margin Call will be considered resolved. If margin levels drop again, a new Margin Call process may be triggered. Any position closures will be carried out at the best available market prices at that time.

FinexGrow.com may, at its sole discretion and based on market conditions, adjust the minimum margin or liquidation levels with or without prior notice. There is no obligation to inform clients when liquidation occurs at the 50% Close Out level.

Client Options During Margin Calls

If you are subject to a margin call, consider the following actions:

- Add additional funds to your account if you expect the market to move in your favor.
- Close or hedge some or all of your positions to reduce exposure.

Clients are responsible for setting their own Stop Loss Orders to help limit potential losses. Occasionally, **FinexGrow.com** may contact clients to discuss possible actions, though this is done as a courtesy and does not imply any future obligation. Requests for additional margin do not establish a precedent, nor do they limit **FinexGrow.com**'s right to liquidate positions in the future.
